main.c

Run ▶

```c
#include <stdio.h>
#include <ctype.h>

int main()
{
    char text[] = "Hello World\nWelcome to C programming";
    int characters = 0, words = 0, lines = 0;
    int inWord = 0, i;

    for (i = 0; text[i] != '\0'; i++)
    {
        characters++;

        if (text[i] == '\n')
            lines++;

        if (isspace((unsigned char)text[i]))
            inWord = 0;
        else if (!inWord)
        {
            words++;
            inWord = 1;
        }
    }

    if (characters > 0 && text[i - 1] != '\n')
        lines++;
```

Output

```
Number of characters: 36
Number of words: 6
Number of lines: 2
```

main.c

Run ▶

```c

    for (i = 0; text[i] != '\0'; i++)
    {
        characters++;
